

# WORLDWIDE COLLABORATION WITH INFONIC GEO-REPLICATOR

FOR MOBILE AND FIELD WORKERS DEPENDENT ON CONTINUOUS LAPTOP CONNECTIVITY TO MAIN SERVER CONTENT, GEO-REPLICATOR ENSURES A FAST AND DEPENDABLE HEAD OFFICE SHAREPOINT EXPERIENCE. EVEN WHEN PERIODICALLY OFFLINE, EVERY LINK IN THE PORTAL WORKS, DOCUMENTS CAN BE UPDATED, AND FULL SEARCH AND ACCESS RIGHTS ARE ENFORCED.

Replication is two-way, so on regaining server connection, offline changes are synchronised from laptop back to server. Familiar SharePoint interfaces negate the need for retraining.

## KEY BENEFITS

- Remote, extranet and mobile users receive 24/7 access to centrally hosted content over a WAN, at LAN speed.
- Uninterrupted continuity, productivity and mobility across the organisation.
- Users interact offline using the same user interface that they have been trained to use online.
- The same replication platform can be used to provide virtualised offline access

to Lotus Domino, Oracle and other web based applications.

- Highly scalable, supporting tens of thousands of users and terabytes of content.

## TECHNICAL INFORMATION

### HARDWARE REQUIREMENTS

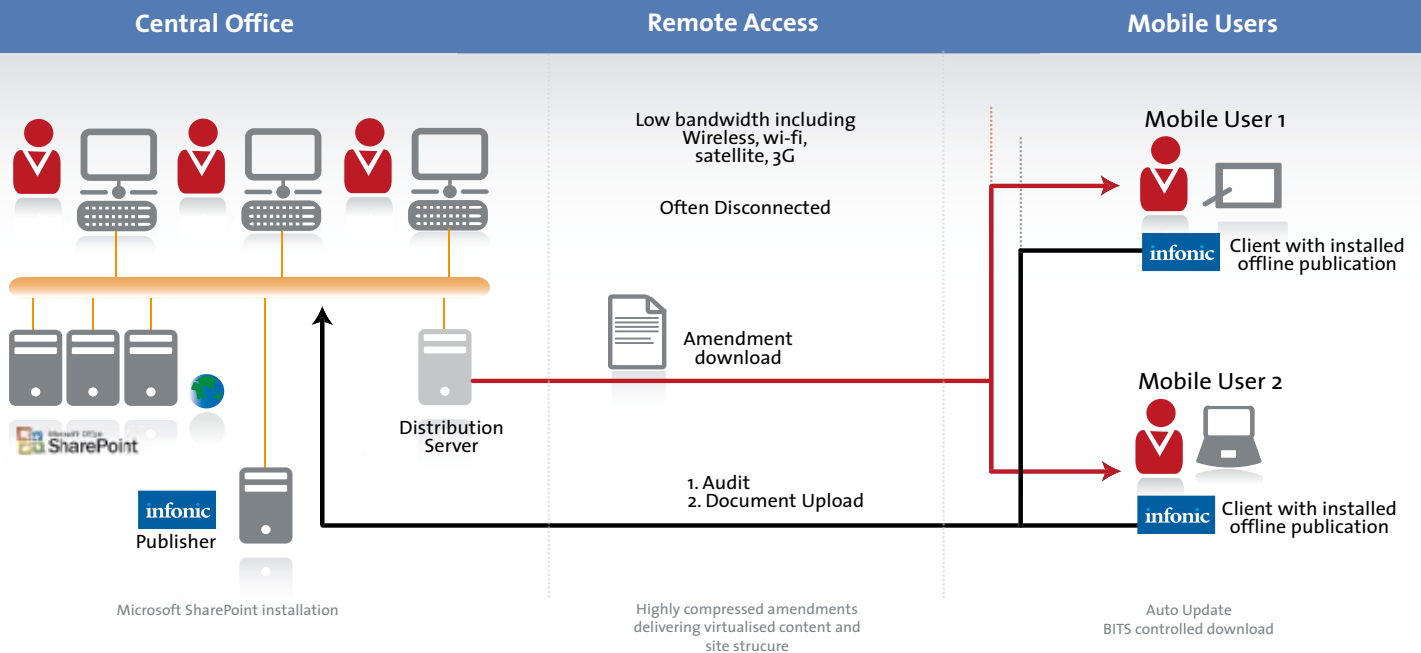

#### ► INFONIC CLIENT REQUIRES AN IBM-COMPATIBLE COMPUTER WITH:

- Minimum 256 MB RAM (512 MB recommended if searching is to be enabled).
- 20 MB free disk space for the Infonic Client software.
- Sufficient disk space to hold the content of any installed publications.

#### ► INFONIC PUBLISHER REQUIRES AN IBM-COMPATIBLE COMPUTER WITH:

- At least 1 GB RAM (2 GB recommended if searching is to be enabled).
- 1.8 GHz CPU or above recommended.
- 50 MB free disk space for the Infonic Publisher software.
- Sufficient disk space for log files. The publisher log files can take up to 50 MB of space with an additional 30 MB for each publication.
- Disk space 2-3 times the total size of the raw content of your publications is recommended. Raw content size is the total size of the documents within the publication rather than the considerably larger database holding the source documents.

# SERVER TO LAPTOP

## SOFTWARE REQUIREMENTS

### ► INFONIC CLIENT AND PUBLISHER REQUIRE

- Windows 2000 Service Pack 4 (or above), Windows XP or Windows 2003 operating system.
- Microsoft .NET 2.0 Framework.
- Microsoft Internet Explorer version 5.0 (or above) installed on the computer not necessarily as default. Support for Netscape and Firefox is available.

## SCALABILITY

There is no theoretical limitation for support of Server to Laptop. However, at the present time, Infonic is currently supporting a customer with 6,000 plus laptops and growing.

### ► SERVER TO CLIENT DISK REQUIREMENTS

The following table shows the disk space requirements for Infonic server to laptop replication components at initial set up time and during normal running:

MODE	INFONIC PUBLISHER	INFONIC CLIENT
Non-searchable Publication	2x replicated raw content	1x replicated raw content
Searchable Publication	2.25x replicated raw content	1.25x replicated raw content
